An HTML5-based interactive video content type allowing users to add multiple choice and fill in the blank questions, pop-up text and other types of interactions to their videos using only a web browser. Make your videos more engaging with H5P and interactive video in publishing systems like Canvas, Brightspace, Blackboard, Moodle and WordPress.

This Interactive Video demonstrates some of the key features. You can add many different types of questions and informational resources. Interactions may or may not pause the video when they appear. They may appear directly or as a button that users can choose to click to reveal the resource. Questions may be adaptive in the sense that the user's answer determines where the user is sent after the answer is provided.

Would you like to create content like this on your own?

Description

Videos may be enriched with interactivities like explanations, extra pictures, tables, Fill in the Blank and multiple choice questions. Quiz questions support adaptivity, meaning that you can jump to another part of the video based on the user's input. Interactive summaries can be added at the end of the video. Interactive videos are created and edited using the H5P authoring tool in a standard web browser.

Learn how to create Interactive videos in [this tutorial](#).

Features

The following H5P content types may be added to your video:

- Multiple choice questions with one or more correct answers
- Free text questions
- Fill in the blank questions
- Drag and drop questions
- Interactive summaries
- Single choice question sets
- Mark the word activities
- Drag and drop text
- Images
- Tables
- Labels
- Texts
- Links

All question types can be configured to perform adaptive behavior, meaning that a correct answer could cause the user to skip to a specified place in the video while an incorrect answer could take the user somewhere else in the video. Typically, submitting a wrong answer will cause the user to be directed to the place in the video where the answer to the question is presented.
